Edwards Plateau Ranch

Game Inventory Report — March 01, 2025 to January 31, 2026

Total Photos	Independent Events	Camera Stations	Species Detected	Flagged for Review
12,019	**3,611**	**14**	**12**	**930 (7.7%)**

Note: All counts use **independent events** (30-min threshold per Cunningham et al. 2021), not raw photo triggers. A single animal visiting a feeder repeatedly counts as one event, preventing 4-10× inflation of activity estimates.

Species Breakdown

Species	Events	Photos	Cameras	Avg Conf.	Status	Notes
White-tailed Deer	1384	4,892	14	88.8%	Native	Buck:Doe 1242:2238 (36%)
Feral Hog	674	2,219	11	85.1%	INVASIVE	256 flagged
Wild Turkey	442	1,405	9	87.6%	Native	41 flagged
Raccoon	378	1,192	12	82.8%	Native	232 flagged
Nine-banded Armadillo	230	731	8	80.5%	Native	159 flagged
Coyote	189	587	10	81.3%	Native	18 flagged
Bobcat	110	358	6	79.3%	Native	39 flagged
Eastern Cottontail	79	245	7	78.5%	Native	33 flagged
Axis Deer	55	187	4	76.8%	INVASIVE	46 flagged
Virginia Opossum	40	122	5	74.9%	Native	60 flagged
Red Fox	20	46	3	73.2%	Native	22 flagged
Gray Fox	10	35	2	71.1%	Native	24 flagged

Activity Patterns

Detection activity by hour of day across all species. Dawn/dusk highlighted in amber; nighttime in blue.

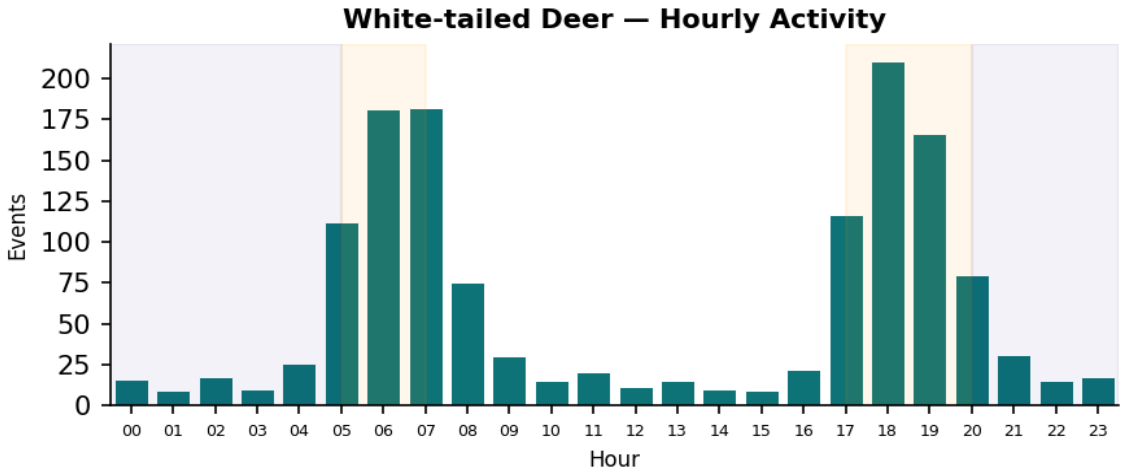
Hour of Day

White-tailed Deer *Odocoileus virginianus*

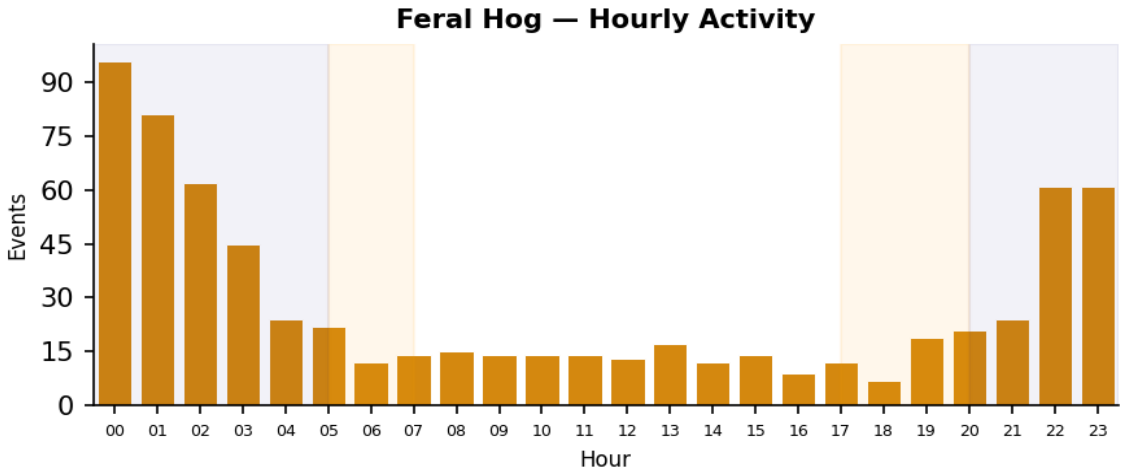
Independent Events: 1384 | **Photos:** 4,892 | **Cameras:** 14 | **Avg Confidence:** 88.8% | **Status:** Native
Antler Classification (May-Nov): 1242 bucks / 2238 does (36% buck rate)



Activity Pattern: Crepuscular (peak hour 18:00 with 211 events; nocturnal 10%, diurnal 36%)
Top Cameras: CAM-P01 (523), CAM-P02 (522), CAM-P03 (515), CAM-T02 (384), CAM-F03 (382)
First Detection: 2025-03-01 07:20 | **Last:** 2026-01-31 18:36 | **Survey Span:** 336 days

Feral Hog *Sus scrofa*

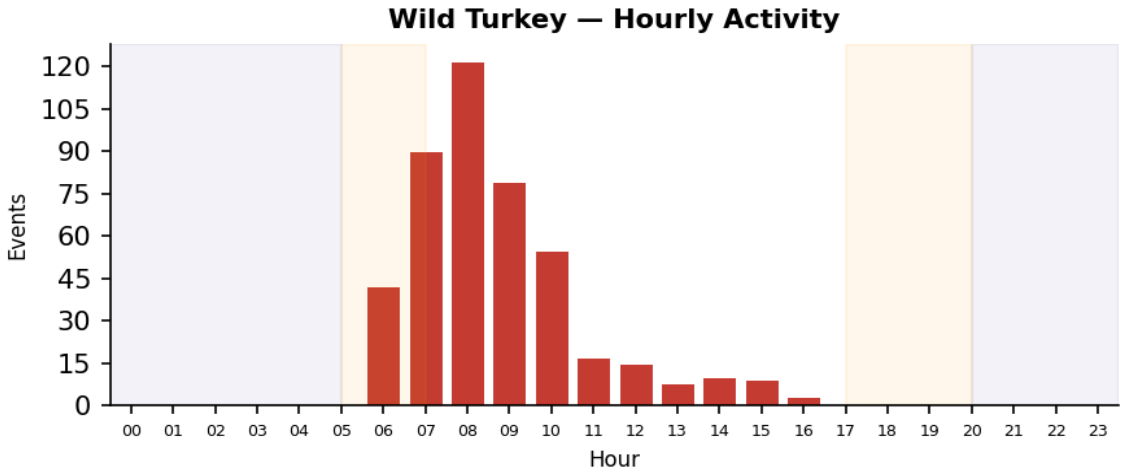
Independent Events: 674 | **Photos:** 2,219 | **Cameras:** 11 | **Avg Confidence:** 85.1% | **Status:** INVASIVE
Review Flagged: 256 photos (11.5% — entropy > 0.59 nats)



Activity Pattern: Nocturnal (peak hour 00:00 with 96 events; nocturnal 66%, diurnal 21%)
Top Cameras: CAM-F01 (401), CAM-F03 (328), CAM-W01 (286), CAM-F02 (282), CAM-W02 (235)
First Detection: 2025-03-01 00:19 | **Last:** 2026-01-31 08:22 | **Survey Span:** 336 days

Wild Turkey *Meleagris gallopavo*

Independent Events: 442 | **Photos:** 1,405 | **Cameras:** 9 | **Avg Confidence:** 87.6% | **Status:** Native
Review Flagged: 41 photos (2.9% — entropy > 0.59 nats)

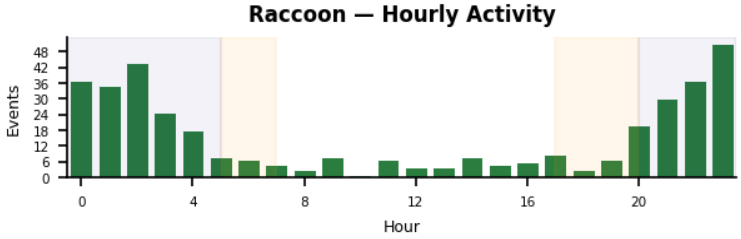


Activity Pattern: Diurnal (peak hour 08:00 with 122 events; nocturnal 0%, diurnal 90%)
Top Cameras: CAM-P03 (276), CAM-P01 (252), CAM-T02 (187), CAM-F02 (150), CAM-F01 (148)
First Detection: 2025-03-02 12:12 | **Last:** 2026-01-31 07:49 | **Survey Span:** 334 days

Additional Species

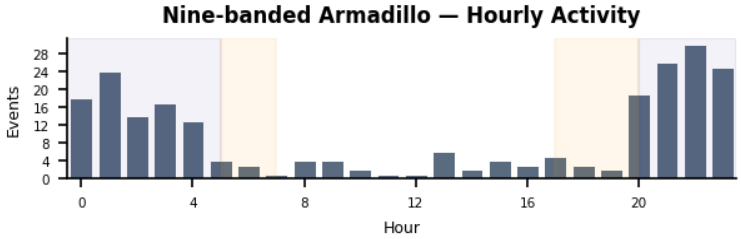
Raccoon *Procyon lotor*

Events: 378 | **Photos:** 1,192 | **Cameras:** 12 | **Conf:** 83% | **Native** | **Nocturnal** (peak 23:00) | **Review:** 232 (19%)



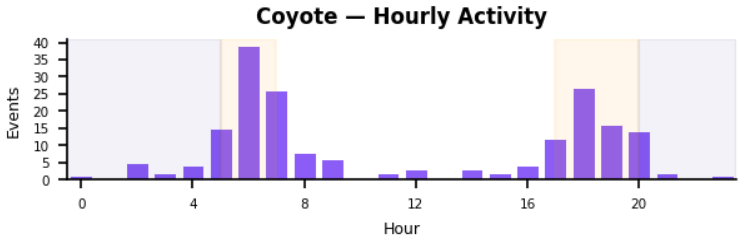
Nine-banded Armadillo *Dasypus novemcinctus*

Events: 230 | **Photos:** 731 | **Cameras:** 8 | **Conf:** 81% | **Native** | **Nocturnal** (peak 22:00) | **Review:** 159 (22%)



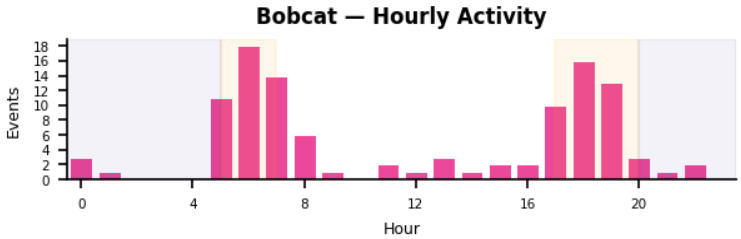
Coyote *Canis latrans*

Events: 189 | **Photos:** 587 | **Cameras:** 10 | **Conf:** 81% | **Native** | **Crepuscular** (peak 06:00) | **Review:** 18 (3%)



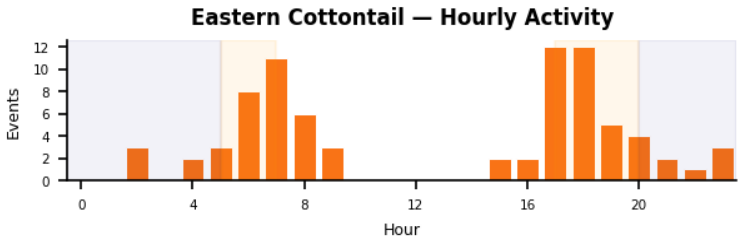
Bobcat *Lynx rufus*

Events: 110 | **Photos:** 358 | **Cameras:** 6 | **Conf:** 79% | **Native** | **Crepuscular** (peak 06:00) | **Review:** 39 (11%)



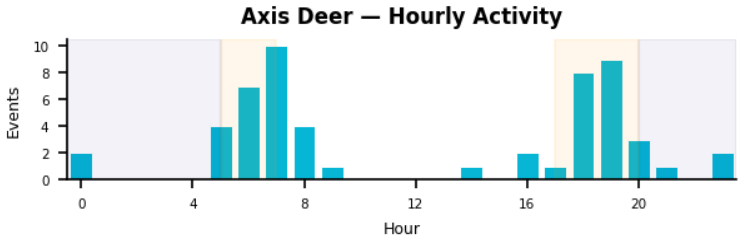
Eastern Cottontail *Sylvilagus floridanus*

Events: 79 | **Photos:** 245 | **Cameras:** 7 | **Conf:** 79% | **Native** | **Crepuscular** (peak 18:00) | **Review:** 33 (13%)



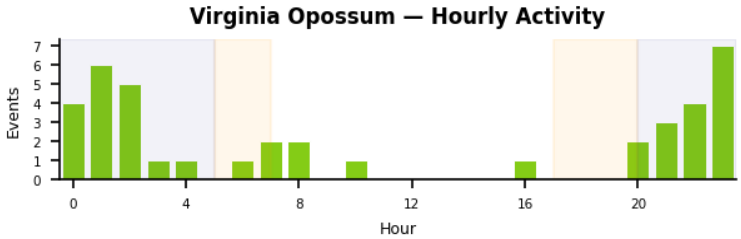
Axis Deer *Axis axis*

Events: 55 | **Photos:** 187 | **Cameras:** 4 | **Conf:** 77% | **INVASIVE** | **Crepuscular** (peak 07:00) | **Review:** 46 (25%)



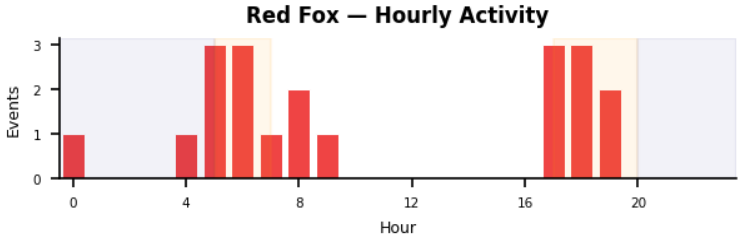
Virginia Opossum *Didelphis virginiana*

Events: 40 | **Photos:** 122 | **Cameras:** 5 | **Conf:** 75% | **Native** | **Nocturnal** (peak 23:00) | **Review:** 60 (49%)



Red Fox *Vulpes vulpes*

Events: 20 | **Photos:** 46 | **Cameras:** 3 | **Conf:** 73% | **Native** | **Crepuscular** (peak 05:00) | **Review:** 22 (48%)



Gray Fox *Urocyon cinereoargenteus*

Events: 10 | **Photos:** 35 | **Cameras:** 2 | **Conf:** 71% | **Native** | **Nocturnal** (peak 00:00) | **Review:** 24 (69%)

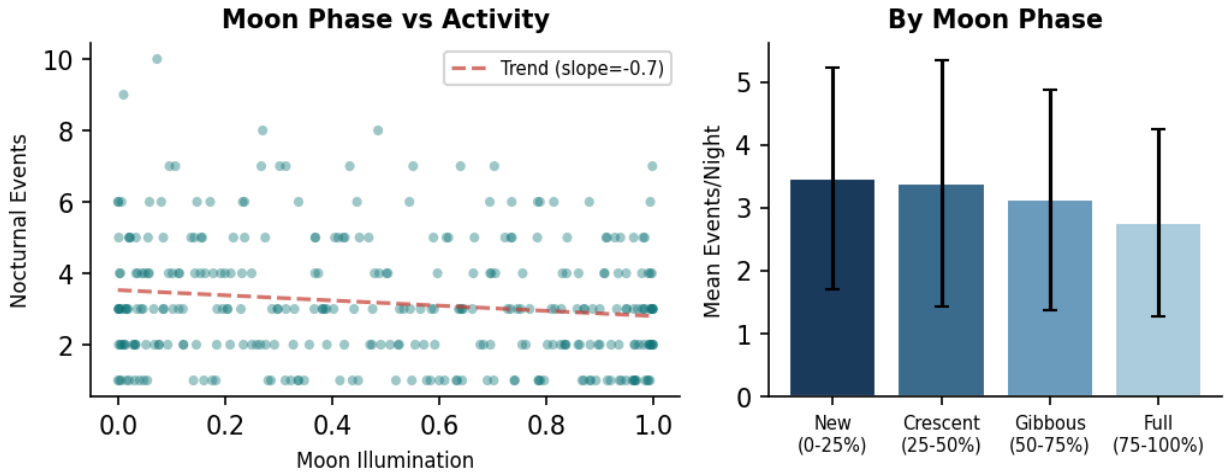
Lunar Illumination & Nocturnal Activity

Correlation between moon phase and nocturnal species activity (feral hog, raccoon, armadillo, opossum, foxes, bobcat). Lunar illumination computed via PyEphem for each survey night at 30.34°N, 99.90°W.



Negative slope indicates reduced activity during brighter moon phases (lunar avoidance), documented in feral hogs (Podgórski et al. 2013) and raccoons. Positive slope suggests moonlight-aided foraging (common in rabbits and small mammals).

Data Files: Full event-level classification data exported to `events_appendix.csv` (3,611 events) and `sorted/manifest.csv` (12,019 photos). Open in Excel for filtering, pivot tables, and custom analysis.
